Efficiency

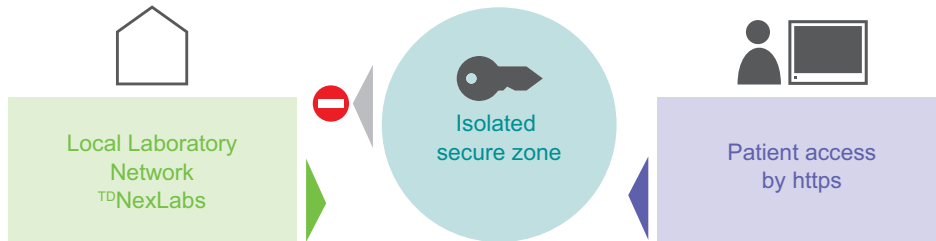

**LEARN MORE**

This is a succinct overview of the main product features, **please contact us if you require further details.**

**TDPatient helps you retain patients through better customer service.**

Respond to your patients' needs by providing them with **rapid** and **secure access** to their results online.

**Security**

- Guarantee secure access to data and respect patient privacy
  - ➔ Provide a unique login and password for each patient
  - ➔ Give access to results via a secure protocol (HTTPS)
  - ➔ Ensure that patient data is isolated from laboratory data (DMZ): the server that stores reports cannot be accessed by unauthorized users
  - ➔ Limit the time period that results are available to reduce the risk of unauthorized access

**Quality of service & Loyalty**

- Enhance your service quality and grow your patients' loyalty
  - ➔ Allow your patients to view their results without having to return to the laboratory
  - ➔ Keep-up with technology and customer expectations by making results available online
  - ➔ Offer secure access and easy PDF download for storage on the home PC

**Customization**

- Customize the interface to access result reports
  - ➔ Access reports directly through your laboratory web portal, to respect your brand identity and graphic standards
  - ➔ If your laboratory does not have a dedicated web portal, benefit from a dedicated Internet page

**Technical overview**

- **For patients:**
  - An Internet browser (IE8, Google Chrome 12, Firefox 4 minimum)
  - Adobe Reader (download possible via a link on the login page)
- **For the laboratory:**
  - IIS (Internet Information Server)
