# ᵀᴰAnalytics®
Livextens

A new dimension for your statistics

With ᵀᴰAnalytics, extract and explore your LIS data to produce the indicators and statistics you need for clear decision making.

Fulfill your querying needs with a professional integrated tool, to extract the core value of the ever-increasing amount of data produced by your LIS.

Immediate

Intuitive

Scalable

Health informatics for the Laboratory
Designed for Patient Safety

TD TECHNIDATA
MEDICAL SOFTWARE

^{TD}Analytics provides the necessary tools to change the daily data produced by the LIS into relevant, yet easy-to-use indicators and statistics.

^{TD}Analytics is a critical tool when it comes to measuring and improving processes, following up turnaround time and more generally **to clarify decision-making**. Not only does it help to meet **accreditation requirements** but it also enables clear insights **to steer the laboratories' efficiency**. Designed for business, quality and financial managers, this engine completes the existing epidemiology and medical queries embedded in the LIS.

Immediate
